Vensysco Technologies <i>Technical Content Engineer</i>	2024-present
<ul style="list-style-type: none">Managed DRM and non-DRM content .Utilized analytics and reporting tools to measure content performance and optimize for better user engagement.Maintained version control for all content updates and revisions.	

PROJECTS

Prashar Bharti OTT | *DRM NON DRM CONTENT*

- Developed and implemented a secure DRM solution for over-the-top (OTT) video streaming platform, ensuring protection of premium content and compliance with studio requirements.
- Implemented DRM solutions for a video streaming service, ensuring secure delivery and protection of premium content.
- Implemented multi-DRM support for Widevine, PlayReady, and FairPlay to provide a seamless viewing experience across various devices and platforms.

Web Weather App | *HTML, CSS, JAVASCRIPT, WEATHER API*

- Designed and developed a dynamic and user-friendly weather web application using HTML, CSS, and JavaScript. Implemented responsive design principles to ensure seamless user experience across various devices.
- Integrated with a weather API to fetch real-time weather data and display it intuitively and visually appealingly.
- Implemented interactive features like location-based weather updates and a user-friendly interface for selecting different cities.

TECHNICAL SKILLS

- HTML5
- CSS3
- JAVASCRIPT
- BOOTSTRAP
- REACT JS
- MySQL
