Work Experience

Technical Application Engineer | Vensysco Technologies | Noida

2024 – PRESENT

- AWS S3 bucket For Storage Utilized Cyberduck for secure file transfers and management.
- Postman for API testing and integration - Content Ingest systems (CIS)
- Implemented Dalet flex for efficient resource allocation and monitoring
- Ensured scalable and secure cloud infrastructure for OTT services OTT Services (Video Streaming)
- Cloud Security (IAM, Encryption, Access Control).
- Used Video Crypt for encrypting and protecting video content.

Technical Skills

- **Web Development:** HTML5, CSS3, JavaScript, React.js, Bootstrap Responsive Web Design, Front-Development
- **Database Management:** MySQL
- **Cloud Platforms:** AWS (EC2, S3, Lambda, Cloud-formation, IAM)

PROJECTS

1.Waves OTT App / Web /Tv (Prasar Bharati)

Project Description

- **The Waves OTT App** is a dynamic Over-The-Top (OTT) streaming platform. high-quality video content to users across various devices (web, mobile, Tv And tablet) The app allows users to stream movies, TV shows, documentaries, and live content on-demand, with features such as personalized content recommendations, user subscriptions, and an easy-to-navigate interface.
- The primary goal of this project was to create a seamless video streaming experience, leveraging cloud infrastructure for scalability and media storage.

Key Responsibilities:

- **Content Management:**
Managed the content ingestion process by importing media files from AWS S3 to the application back- end for processing, ensuring efficient storage and retrieval of large media assets
- **Metadata Creation:**
Created and structured **metadata in JSON format**, ensuring accurate categorization and easy retrieval of media details such as title, description, duration, genre, and more.
- **Content Distribution:**
Coordinated with the **Production API** to send and synchronize content to **CIS (Content Information System)**, ensuring that content was available for streaming and metadata was correctly linked.
- **Integrated Video Streaming Features:**
Integrated streaming functionality by incorporating video player components, ensuring smooth video playback and adaptive streaming quality

2. Web Weather App | HTML, CSS, JAVASCRIPT, WEATHER API

- Designed and developed a dynamic and user-friendly weather web application using HTML, CSS, and JavaScript. Implemented responsive design principles to ensure seamless user experience across various devices.
- Integrated with a weather API to fetch real-time weather data and display it intuitively and visually appealingly.
- Implemented interactive features like location-based weather updates and a user-friendly interface.
